WALL MOUNTED

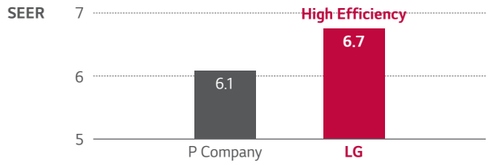
Saving Operation Cost

High Energy Efficiency

The advanced technologies of LG achieve lower energy consumption, especially in cooling as can be seen from the SEER class given according to ErP Regulations.

Server room need to be operated continuously.
That's why server room owners want to use high energy efficient air conditioning.
LG solution saves annual operation cost for server room due to high SEER.

Competitor



※ P Company 7.1kW Solution / Outdoor unit : 7.1kW
Indoor unit : 7.1kW Wall mounted unit
※ Performances are based on the following conditions :
- Cooling : Indoor Temp. 27°CDB / 19°CWB, Outdoor Temp. 35°CDB / 24°CWB
- Heating : Indoor Temp. 20°CDB / 15°CWB, Outdoor Temp. 7°CDB / 6°CWB
- Interconnected Pipe is standard length and difference of Elevation (Outdoor ~ Indoor Unit) is 0m.

LG Server Room Solution

SEER class (ErP regulation)

	2.5kW	3.4kW	5.0kW	6.8kW	8.0kW	9.5kW
SEER	7.0 (A++)	6.6 (A++)	6.8 (A++)	6.7 (A++)	7.0 (A++)	6.1 (A++)
SCOP					4.3 (A+)	3.85 (A+)

SEER class (ErP regulation)

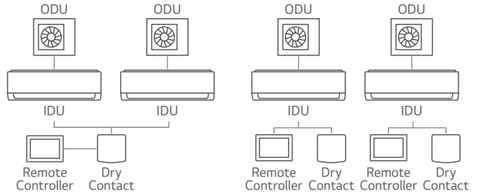
A+++	SEER≥8.5	B	4.6 ≤ SEER < 5.1
A++	6.1 ≤ SEER < 8.5	C	4.1 ≤ SEER < 4.6
A+	5.6 ≤ SEER < 6.1	D	3.6 ≤ SEER < 4.1
A	5.1 ≤ SEER < 5.6		

Easy Installation

Simplified Connection

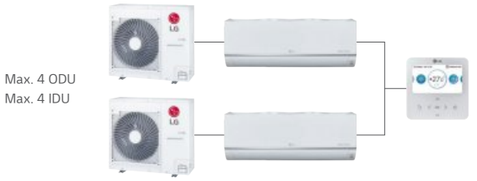
For small server rooms, LG provides a simple system with only one remote controller. It doesn't need additional control accessories.

Conventional



- **Higher product cost**
  A conventional system needs a dry contact and 3rd party control individual remote controller(s).
- **Higher installation cost**
  Need more labor and time for design, installation, cabling and test.
- **Design & Installation difficulties**
  It is difficult to make if you need to control more indoor units.

LG Server Room Solution

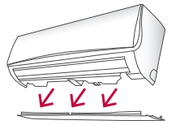


- **Lower product cost**
  Only one LG's remote controller needed for max.4 ODUs and IDUs.
- **Lower installation cost**
  Need less labor and time for design, installation, cabling and test.
- **Easy Design & Installation**
  It provides easy design and installation because of a simple system with LG controller even in case of more number of ODUs and IDUs(Max.4).

※ MJ09PC, MJ12PC, MJ18PC, MJ24PC combinations are only available

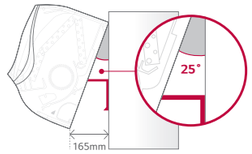
Detachable Bottom Cover

The bottom cover is detachable when needed, making installation easier. Disassembly or additional support of the unit is unnecessary. Installation can be completed by one individual with LG's patented support tool.



Installation Support Clip

A support clip creates adequate space between the wall and the unit for easier installation.



※ This contents of page will be updated later. (Saving operation cost / Easy installation)

Stable & Reliable Operation

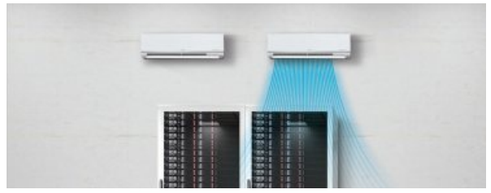
Duty Rotation

Operates more than 2 sets of indoor units alternatively at every set time of operation interval. Rotation interval can be set from 1h to 999h freely.

Without Duty Rotation

Air Conditioners' Overworking
- Shortening an air conditioner's lifetime
- Reducing compressor's life expectancy
- The service cost may increase due to an air conditioner's overworking

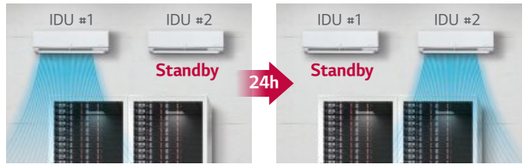
Duty Rotation



Stable & Safe Operation
- Stable operation due to indoor units taking turns when operating
- Less breakdowns and operational server room
- The air conditioner's life expectancy is increased
- Rotation interval can be set from 1h to 999h freely

Operation Scenario

When the number of the indoor units : 2
If the interval time is set 24h(default),
❶ While IDU #1 operates during interval time, IDU #2 is on standby.
❷ IDU #2 operates next 24 hours, and IDU #1 is on standby.



Failure Back-up

If systems in operation have an error and stop, the standby unit starts operation automatically.

Without Failure Back-up

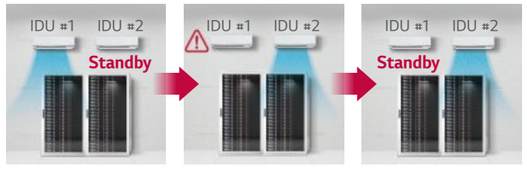
A server can be shut down
- In case of an overheated server room a server can be shut down
- The risk of an increased service cost
- The need for manual monitoring and operation for failure

Failure Back-up

Stable & Safe Operation
- Stable operation because the operation error can be covered by failure back-up operation
- Continuous server operations and decreased risk
- The server is protected from overheating
- Less manual work

Operation Scenario

When the number of the indoor units : 2
❶ When duty rotation is enabled, IDU #1 is in operation and IDU #2 is on standby.
❷ If an error occurs on IDU #1, a standby unit starts operation.
❸ After the error is cleared, IDU #2 goes back to standby.



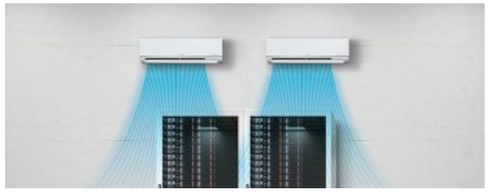
Capacity Back-up

When the difference between the cooling set temperature and the current room temperature is higher than the set temperature difference of capacity back-up, the standby unit operates. When the temperature difference reaches the set temperature difference, it goes back to the normal duty rotation.

Without Capacity Back-up

Server can be Overheated
- Sometimes the server room can be overheated because of the server overload
- The servers can be shut down when they overheat continuously
- Air conditioners overload
- Need manual controls for additional cooling

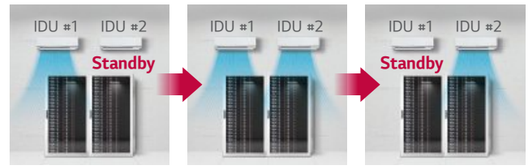
Capacity Back-up



Stable & Safe Operation
- Stable operation due to the over capacity by back-up operation
- Prevent air conditioners from overload
- Protect server from overheating
- No need for manual controls due to the automatic protection from overheating

Operation Scenario

When the number of the indoor units : 2
The set temperature difference is A, and the difference between the cooling set temperature and the current room temperature is B,
❶ When duty rotation is enabled, IDU #1 is in operation and IDU #2 is on standby.
❷ If B is higher than A, the standby unit starts operation.
❸ When B goes down and remains below A for some time, The backup unit stops and goes back to standby mode.



If cooling set temperature is 22℃ and the set temperature difference is 4℃.

When current temperature goes above 26℃, the standby unit starts operation.

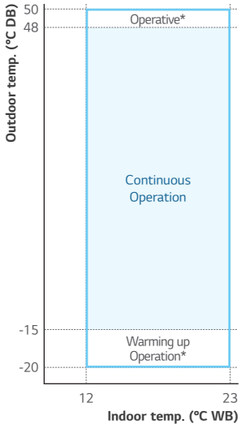
If currnet temperature drops and remains below 26 ℃ for some time, the backup unit stops.

※ Duty rotation, capacity back-up, failure back-up function will be available from 2021.2Q - Applied models : MJ09PC, MJ12PC, MJ18PC, MJ24PC only

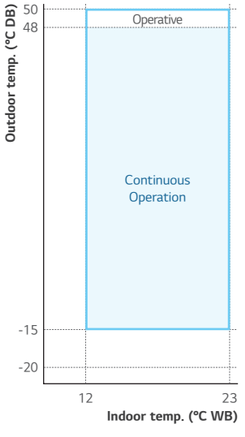
Wide Operational Range

In case of the server room, continuous cooling is required all year round, and outdoor unit must be stable in the outdoor harsh cold temperature. LG Single split has wide operation range in cooling down continuously from -15°C and up to 48°C.

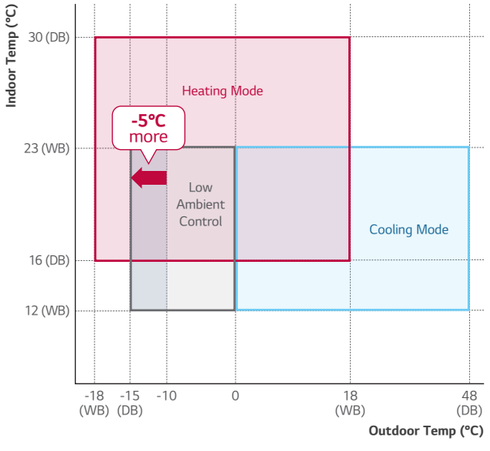
6.8kW Model



2.5 / 3.4 / 5.0kW Model



8.0 kW / 9.5 kW Model



* Warming up operation and operative means that the outdoor unit operates to reach the range of continuous operating, however it may not operate continuously due to safety or protection logic.
